

CLAIMS

What is claimed is:

1. A wireless phone capable of being carried by a user, the phone comprising:  
a primary display; and  
an auxiliary display, angled with respect to the primary display;  
the phone being capable of detachably attaching to the user so that, when the  
phone is in the attached position on the user, the auxiliary display is viewable to the user.
2. The phone of claim 1, wherein the primary display of the phone is angled at least  
45 degrees with respect to the auxiliary display.
3. The phone of claim 1, wherein the phone is capable of receiving an incoming call  
from a caller, the incoming call having caller ID information, and the auxiliary display is  
capable of displaying the caller ID information of the incoming call.
4. The phone of claim 3, wherein the caller ID information includes at least one of:  
an originating phone number of the incoming call, and a name of the caller assigned to  
the originating phone number.
5. The phone of claim 1, wherein the auxiliary display is adapted to display  
alphanumeric characters.
6. The phone of claim 1, wherein the auxiliary display is a liquid crystal display.
7. The phone of claim 1, wherein the phone is capable of being attached to a belt on  
the user.

1 8. The phone of claim 1, wherein the auxiliary display is capable of displaying  
2 information about the phone including at least one of: a battery level of the phone, a  
3 signal strength of the phone, and a roaming mode of the phone.

1 9. A portable phone having a first section rotatably attached to a second section, said  
2 first section being rotatable with respect to said second section such that said first section  
3 makes contact with said second section in a closed position, said phone further  
4 comprising:

5 a primary display on said first section of the phone; and  
6 an auxiliary display viewable to a user when the phone is in the closed position.

1 10. The phone of claim 9, wherein when the first section of the phone is rotated to  
2 contact the second section of the phone, the primary display is covered by the second  
3 section.

1 11. The phone of claim 9, wherein the phone is adapted to receive an incoming call  
2 from a caller, the incoming call having caller ID information, and the auxiliary display is  
3 capable of displaying the caller ID information of the incoming call.

1 12. The phone of claim 11, wherein the caller ID information includes at least one of:  
2 an originating phone number of the incoming call, and a name of the caller assigned to  
3 the originating phone number.

1 13. The phone of claim 9, wherein the auxiliary display is adapted to display  
2 alphanumeric characters.

1 14. The phone of claim 9, wherein the phone is capable of detachably attaching to the  
2 user when in the closed position.

1 15. The phone of claim 14, wherein said phone is capable of being attached to a belt  
2 on the user.

1 16. The phone of claim 9, wherein the auxiliary display is capable of displaying  
2 information about the phone including at least one of: a battery level of the phone, a  
3 signal strength of the phone, and a roaming mode of the phone.

1 ~~17.~~ A wireless phone capable of being carried by a user, the phone comprising:  
2 a display having a first portion and a second portion, said second portion being  
3 angled with respect to said first portion; and  
4 said phone being capable of detachably attaching to the user so that, when the  
5 phone is in the attached position on the user, said second portion of the display is  
6 viewable to the user.

1 18. The phone of claim 17, wherein said first portion of the display is angled at least  
2 45 degrees with respect to said second portion of said display.

1 19. The phone of claim 17, wherein the phone is adapted to receive an incoming call  
2 from a caller, the incoming call having caller ID information, and said second portion of  
3 the display is capable of showing the caller ID information of the incoming call.

1 20. The phone of claim 19, wherein the caller ID information includes at least one of:  
2 an originating phone number of the incoming call, and a name of the caller assigned to  
3 the originating phone number.

1 21. The phone of claim 17, wherein said second portion of the display is capable of  
2 displaying alphanumeric characters.

23. The phone of claim 17, wherein said second portion of the display is capable of displaying information about the phone including at least one of: a battery level of the phone, a signal strength of the phone, and a roaming mode of the phone.
